

Chicago Area Modernization Program Office

The City of Chicago and the State of Illinois are simultaneously pursuing separate initiatives to modernize Chicago O'Hare International Airport and establish a South Suburban Airport in Peotone, Illinois. Given the scope and complexity of each of these initiatives, high levels of FAA involvement will be required in every major functional area as work proceeds, beginning with environmental assessment and master planning. The FAA has established the Chicago Area Modernization Program Office to integrate all FAA activities associated with meeting FAA's commitments in the event favorable Environmental Impact Statement Records of Decision are reached.
